

We are a global technology company, specialized in business digital transformation and innovation, with a focus on personalized solutions and professional services..

Our mission is to help companies to adopt technologies in order to **increase agility, reduce costs, maximize performance, and overcome the challenges of the new digital age.**

What is Modernizing Applications?

Consolidate application code and its dependencies in containers, deploy as microservices, and manage processes using DevOps tools.

>35%
of all productive applications will be cloud native by 2021.

Speed to innovate.

- + Modernized developer experience with the best tools.
- + More complete tools from repository to production.
- + Scaling of servers and infrastructure services to manage.

- + Fully managed database services with high availability > 99,999
- + Single digit millisecond latencies on reads and writes.
- + Available in more regions than any other cloud provider.

Reliability.

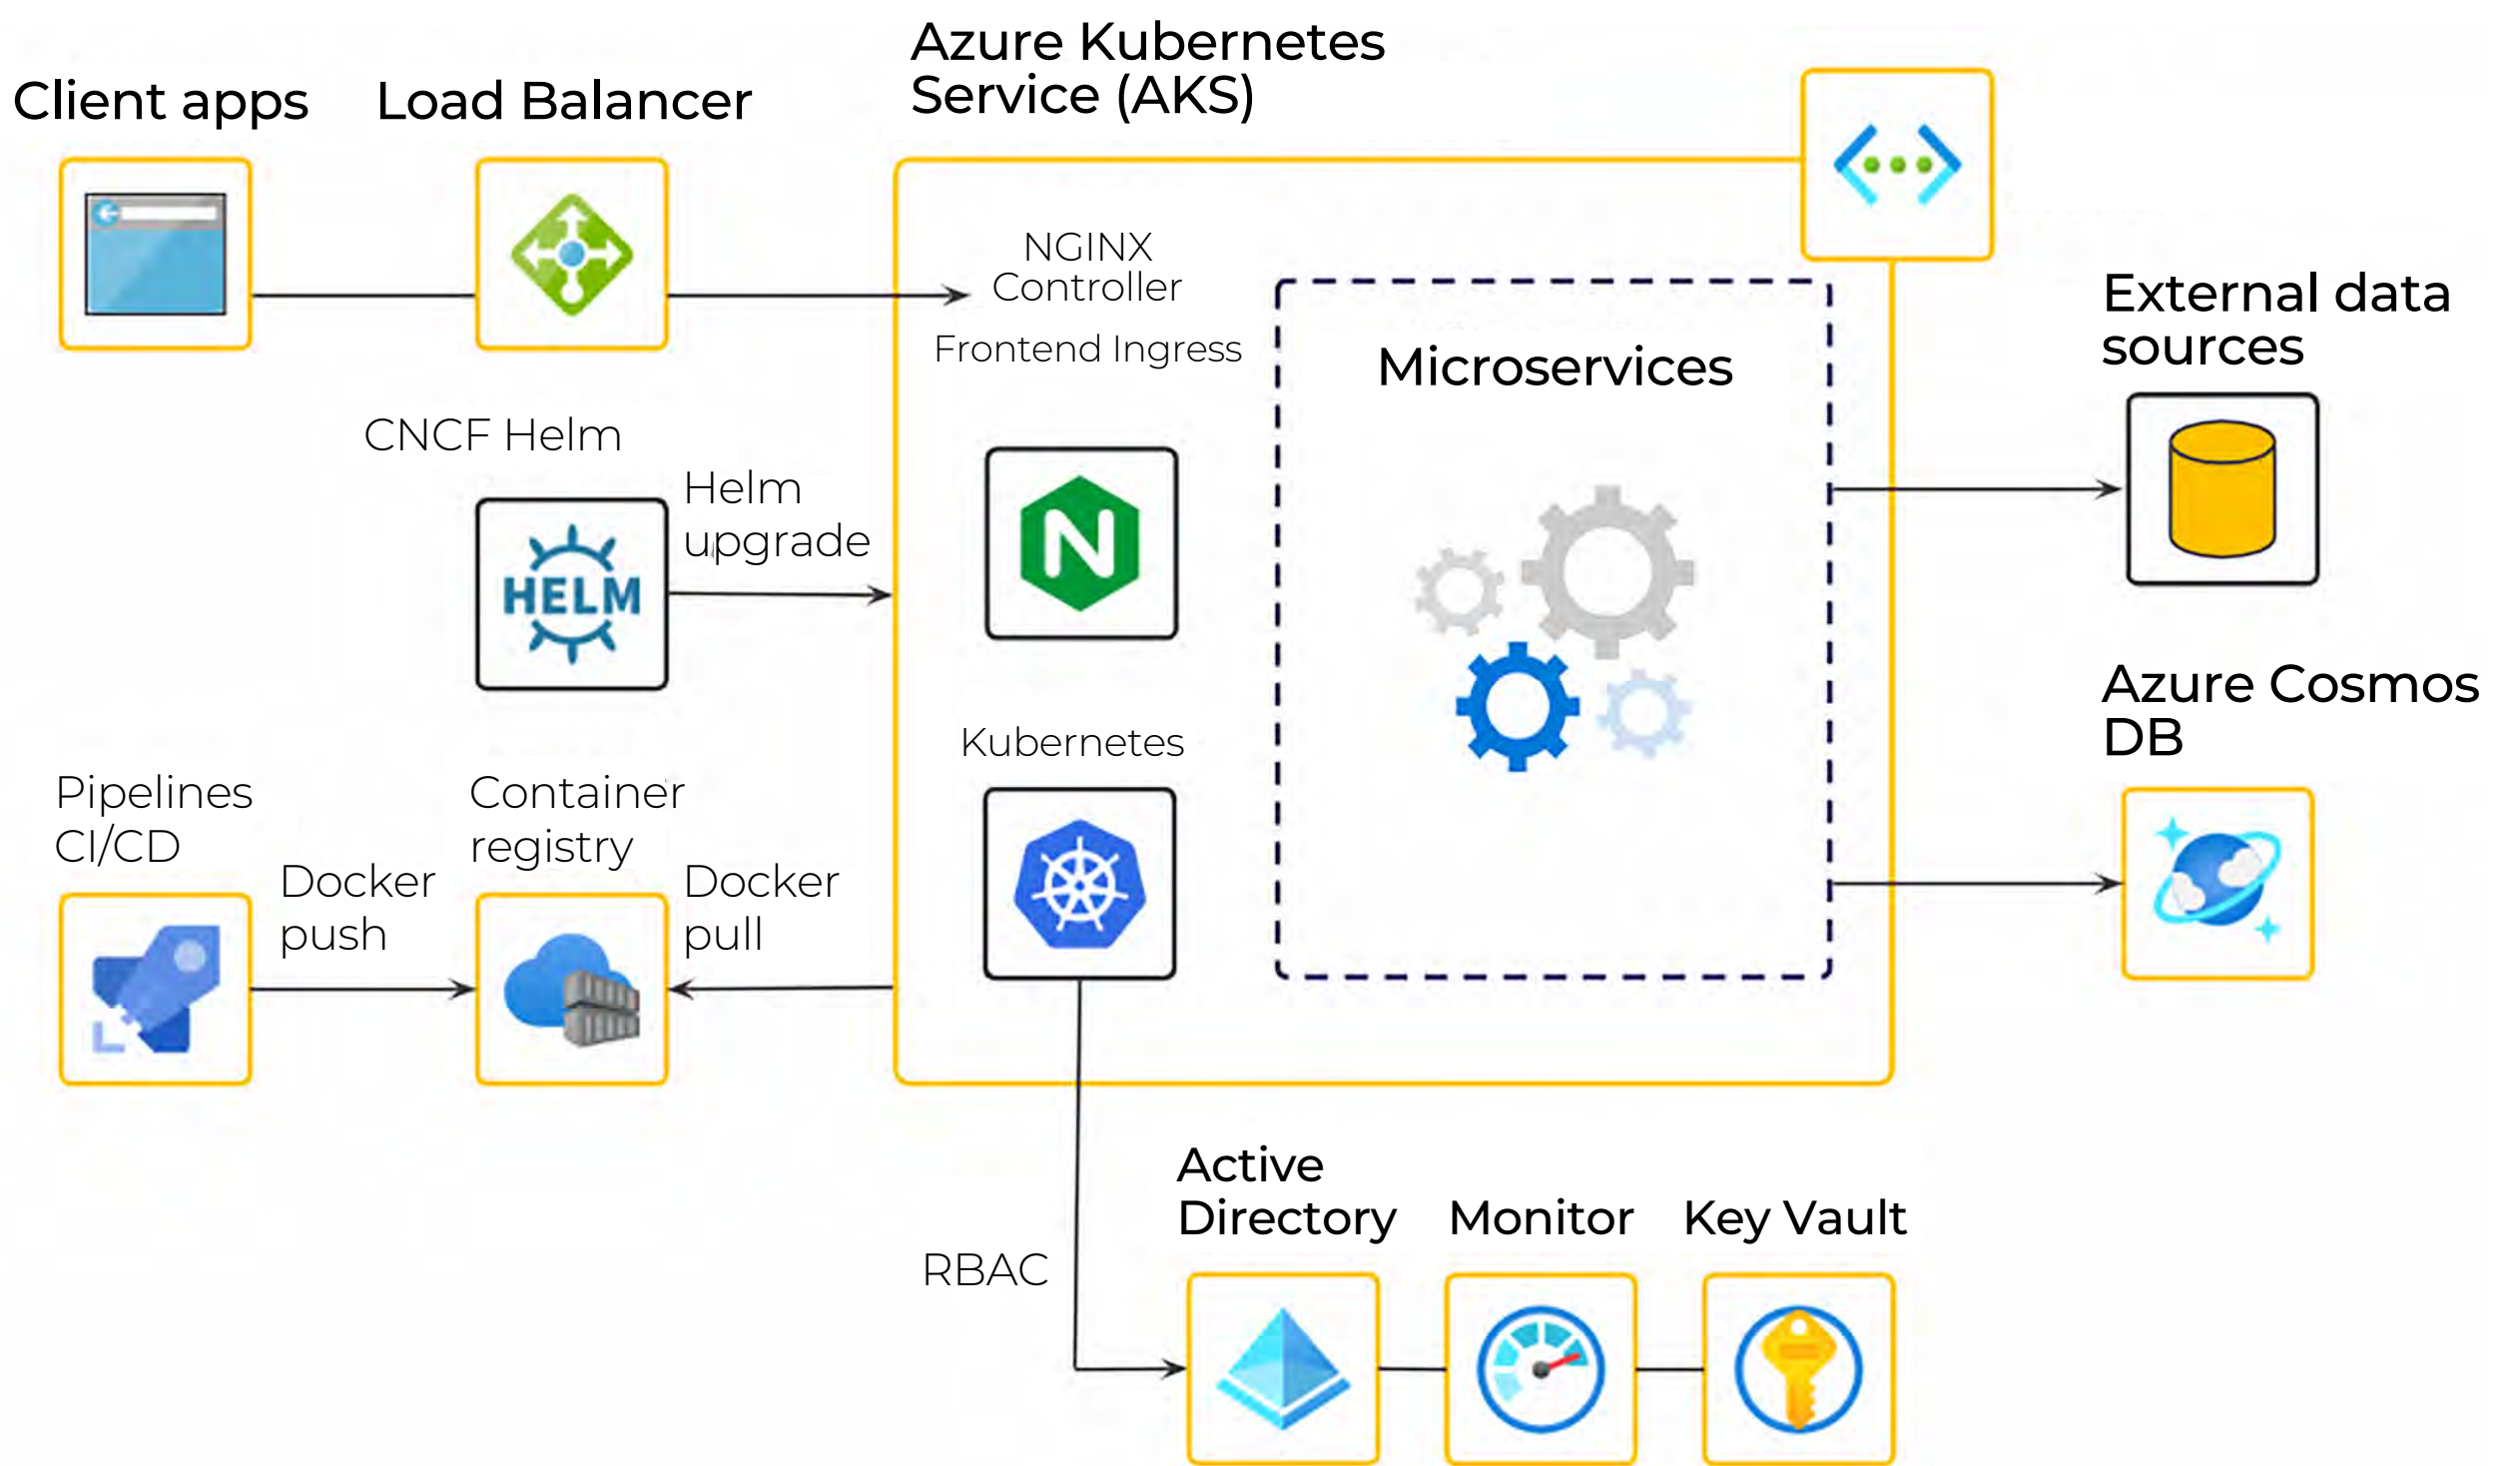

- + \$1 billion investment each year in security.
- + > 90 compliance certifications.
- + Out-of-the-box integration with Azure Policy, Active Directory, and Security Center.

Security at scale.

Example of Modernized Architecture

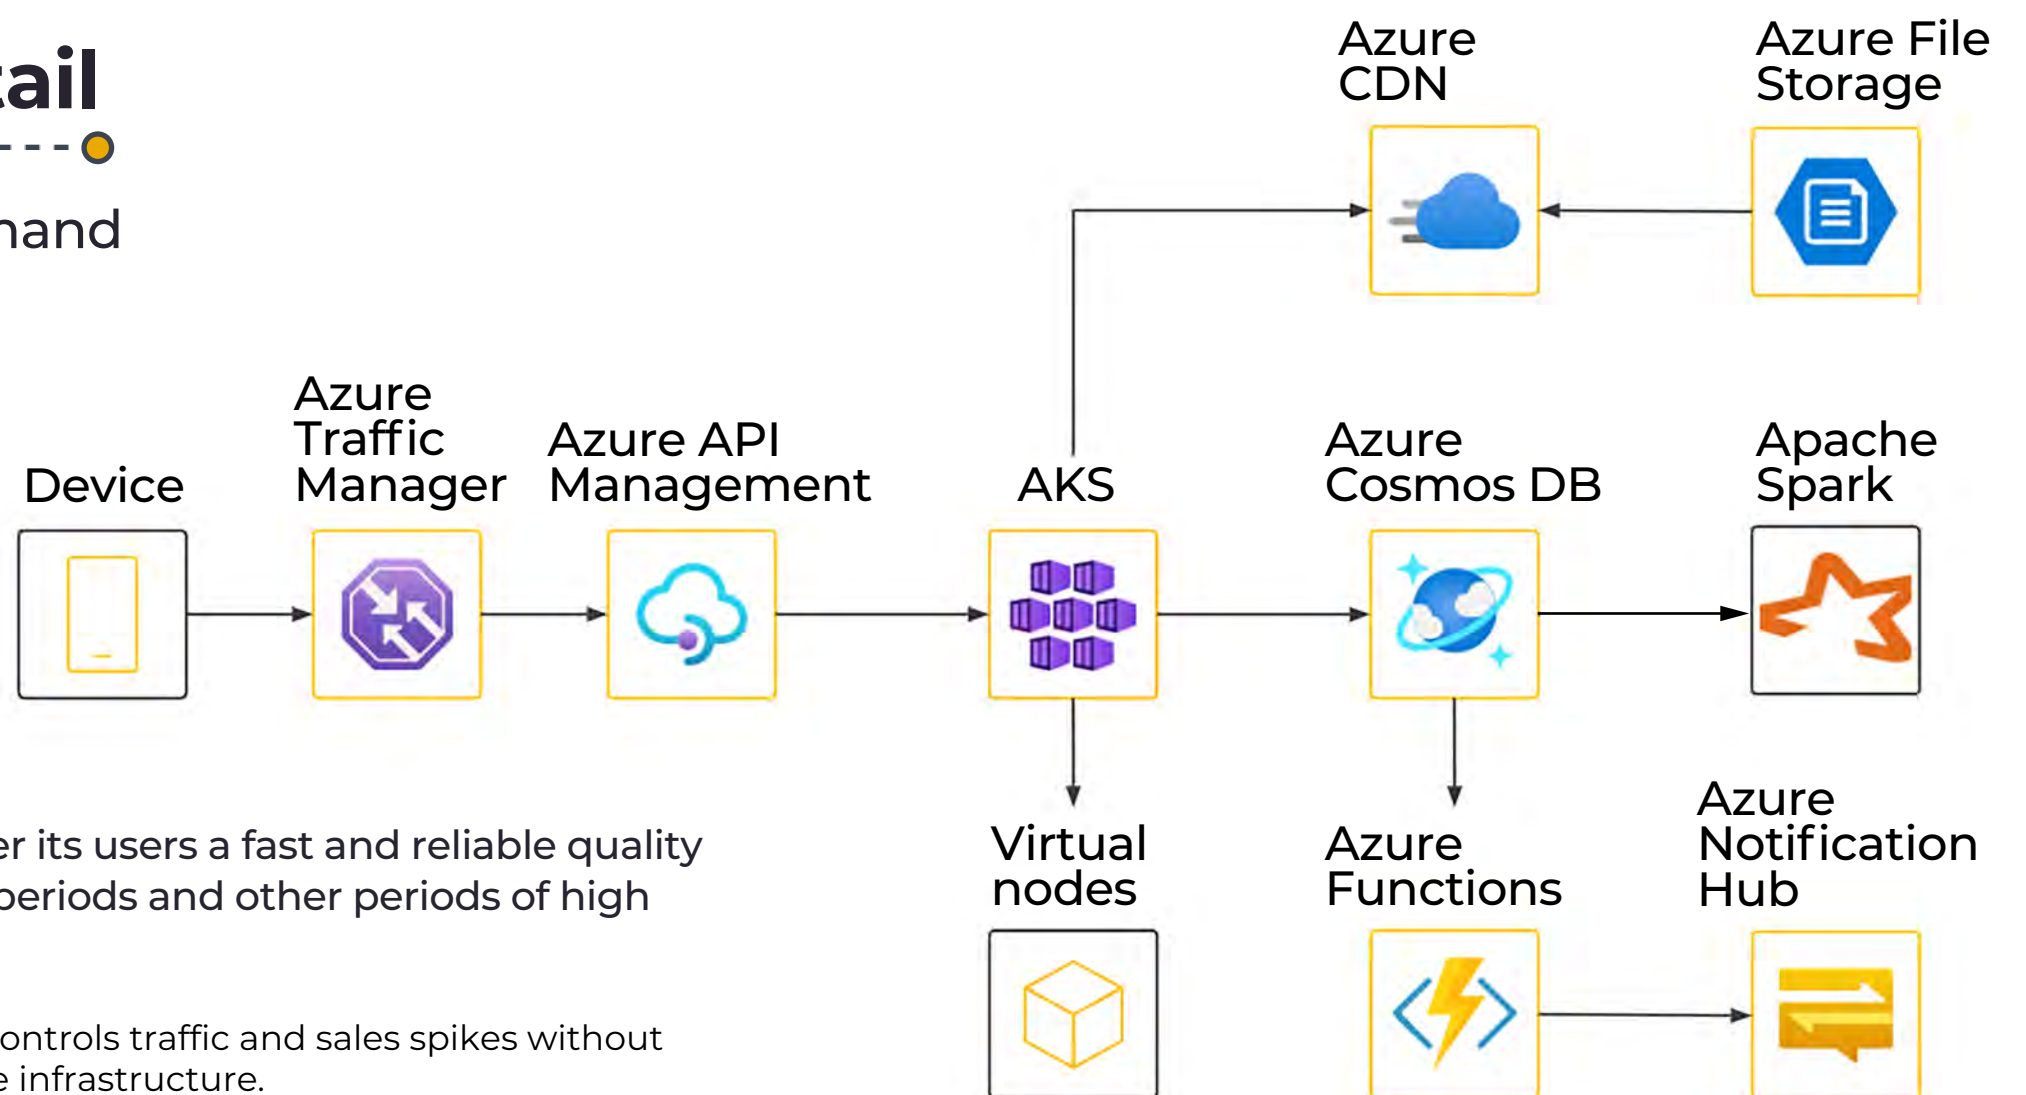

Scenarios to modernize

Use case | Retail

Handle spikes in demand with ease.

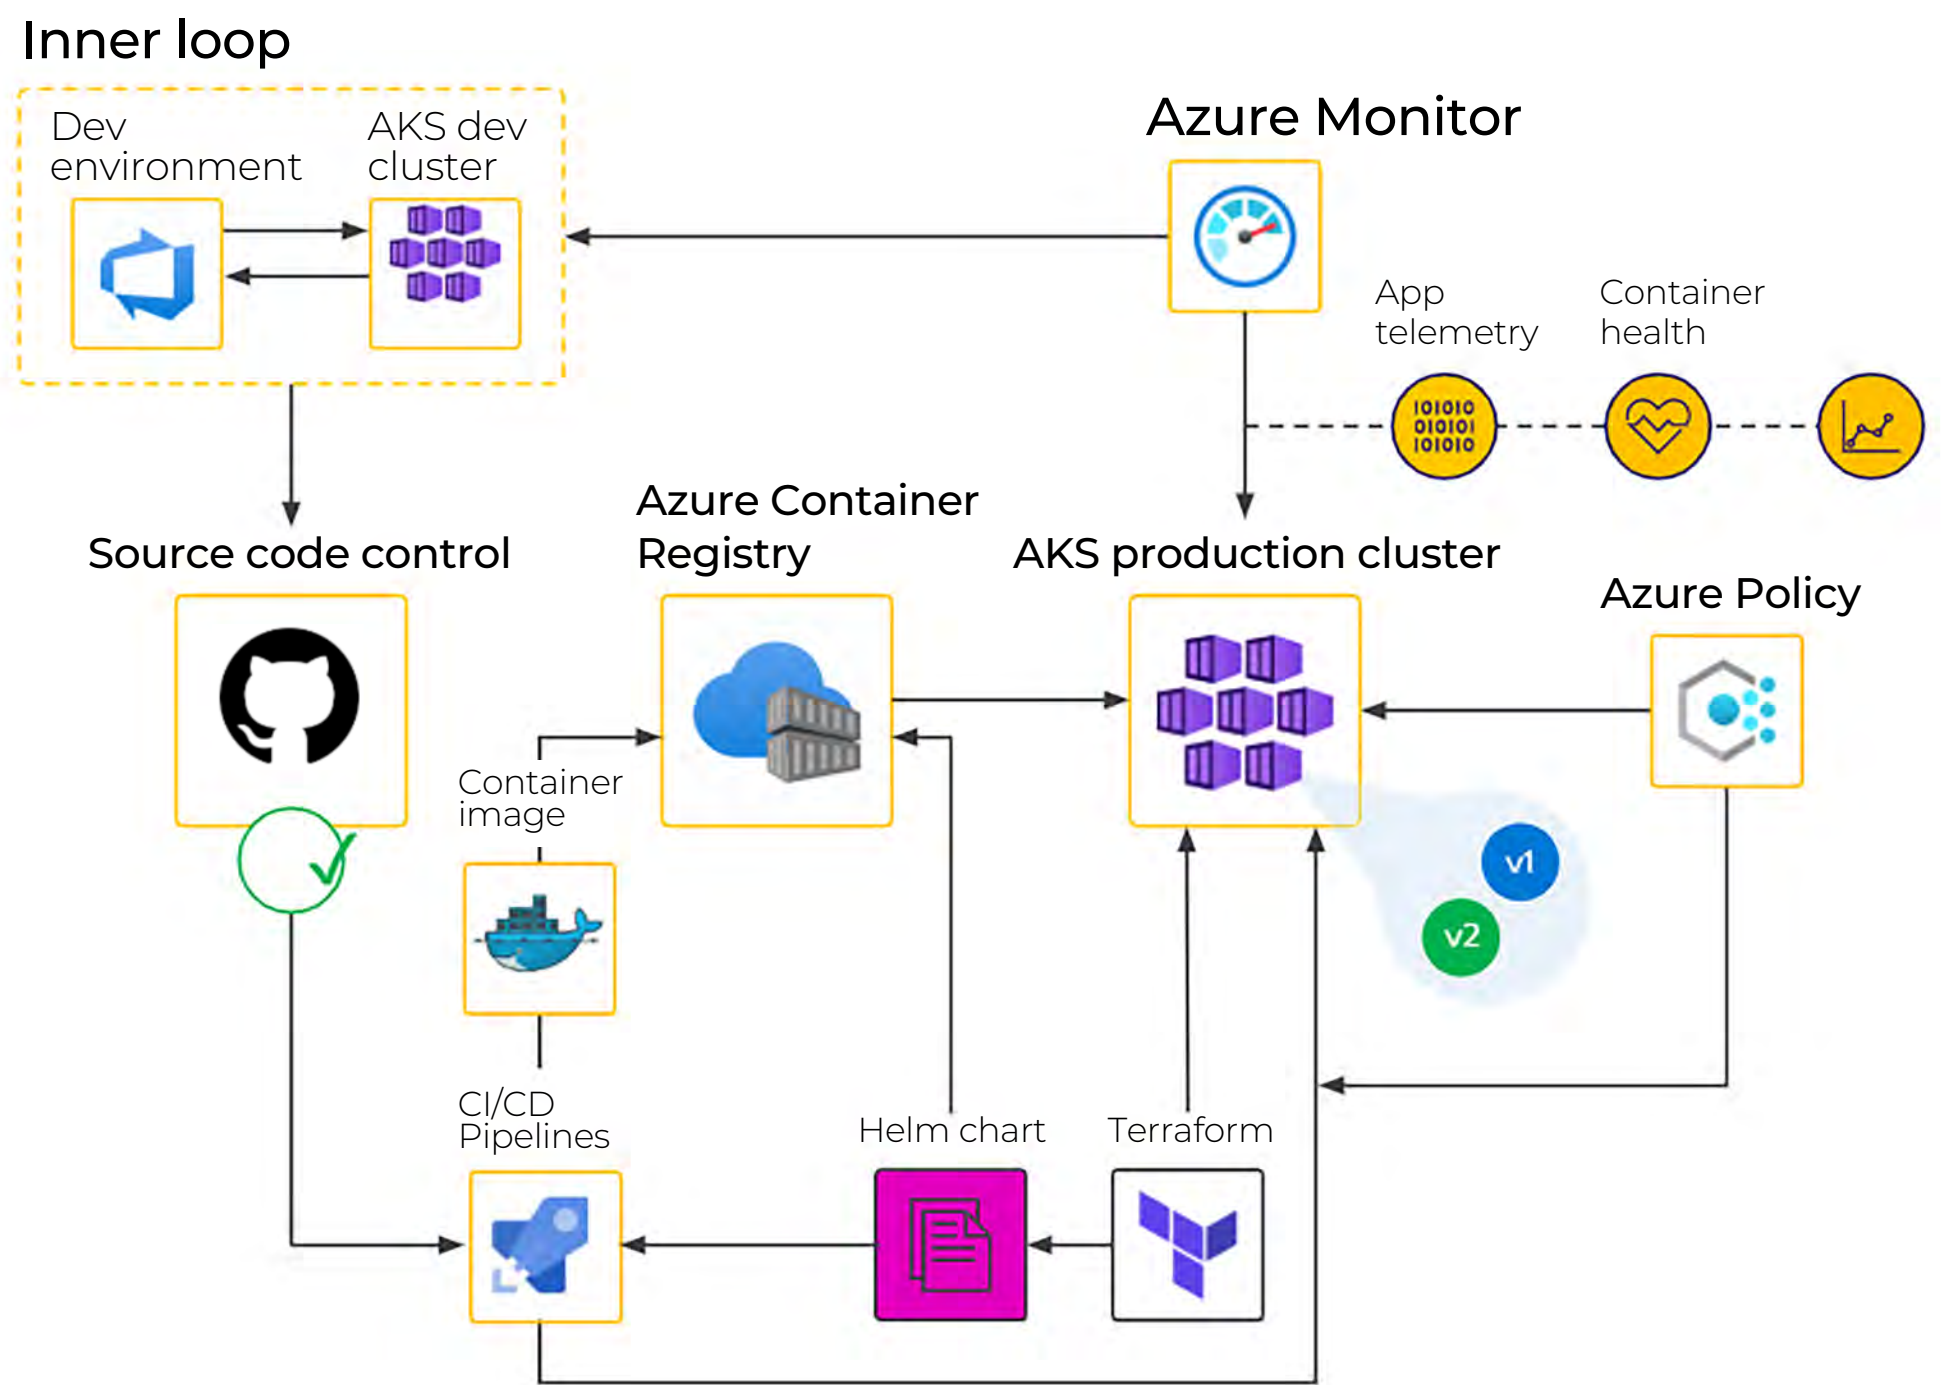

The customer wants to offer its users a fast and reliable quality of service during seasonal periods and other periods of high traffic demand:

- ✦ Instant and elastic scaling controls traffic and sales spikes without having to manually manage infrastructure.
- ✦ Access data with low latency from anywhere for fast and robust user experiences.
- ✦ High availability in multiple data centers.

Use case | E-Commerce

Continuous delivery of new features in no-cut applications.

Increase team agility with simplified DevOps without compromising security:

- + Faster code delivery with managed Kubernetes and built-in CI / CD.
- + Accelerate feedback and monitoring in real time.
- + Balancing speed and security with continuous security and deep traceability.

Microsoft + Nubiral.

As Gold Cloud Partner we work together with Microsoft every day to be able to offer our clients the most innovative solutions based on the different microservices and capabilities that the Azure cloud offers, meeting the different business requirements.

In addition, our team is constantly being trained and certified in the Azure services portfolio.
