

What is

E-Working?

E-Working is the solution that combines our IT expertise with Windows Virtual Desktop in order to enable a safe remote work environment, providing users with the familiarity and compatibility of Windows 10 with the new scalable experience for multiple sessions and costs savings using the same Windows licenses. Additionally, it allows you to manage your entire Windows Virtual Desktop deployment along with other Azure services in the Azure portal.

Reasons to trust in E-Working.

Dynamic policy engines.

- Use conditional access to manage risk before granting users access to the Windows Virtual Desktop environment.
- Set up multi-factor authentication for a safe login.
- Protect your Azure infrastructure by enabling role-based access control (RBAC) and detect threats with Azure Security Center.

Built-in security.

- Securely store all company and employee data in Azure instead of local desktops.
- Take advantage of Azure's security offering, including Azure Firewall, Azure Security Center, Azure Sentinel, and Microsoft Defender ATP, for comprehensive security from endpoint to application.

Compliance.

Take advantage of Windows Virtual Desktop compliance certifications such as ISO 27001, 27018, and 27701, PCI, FedRAMP

What are the Benefits?

1

Access Windows 10 desktop and applications from anywhere and on any device.

You can easily run multiple simultaneous interactive user sessions with the same deployment for greater.

2

Seamless Microsoft Teams and Microsoft Office experience.

It allows you to provide employees with the same experience as with a local desktop or laptop, whether it is managing your inbox with Outlook, sharing files on OneDrive, or collaborating with colleagues in Microsoft Teams meetings.

3

Costs reduction.

It reduces infrastructure costs and management overhead by moving your entire VDI infrastructure to a managed cloud service.

4

Fast implementation and scale of solutions with the Azure portal.

Set up the network, deploy the desktop, and enable security with just a few clicks. In addition, it allows you to configure auto-scaling with Logic Apps.

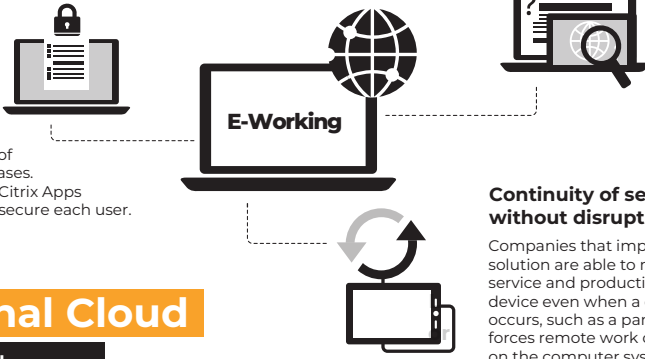

Applications >>>>

Fast provisioning.

This solution allows provisioning of virtual desktops in a few minutes and in a simple way so that users can continue working with their applications and data as soon as possible.

Maximum data security.

In disruptions, the risk of endpoint attacks increases. For this, a solution like Citrix Apps Desktops is needed to secure each user.

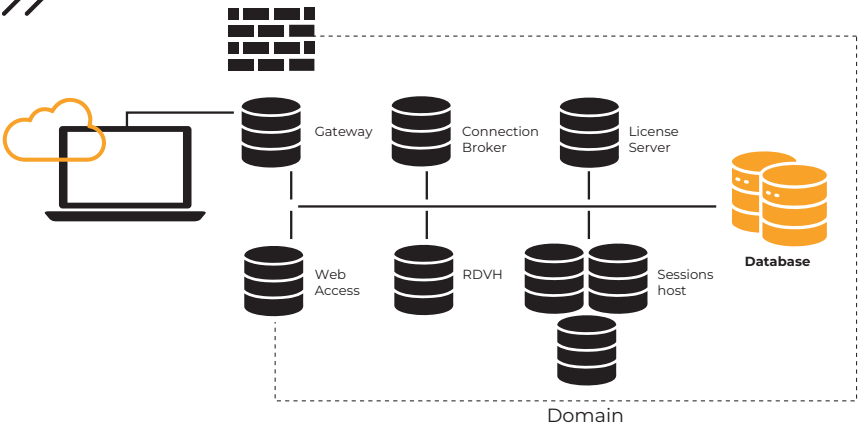

Continuity of service without disruption.

Companies that implement this solution are able to maintain service and productivity on any device even when a disruption occurs, such as a pandemic that forces remote work or an attack on the computer system.

About us

We are a global technology company, specialized in business digital transformation and innovation, with a focus on personalized solutions and professional services. Our mission is to help companies to adopt technologies in order to increase agility, reduce costs, maximize performance, and overcome the challenges of the new digital age.

What makes us unique

We promote the culture of data and innovation in business processes:

we develop customized workshops and discovery processes, made up of multidisciplinary teams between the client and our specialists with the aim of capturing business needs and opportunities for improvement.

End to end projects: we participate in the value generation process from the diagnosis of each client's situation to the construction and support throughout the digital transformation journey.

Availability and global presence: our multidisciplinary staff is available 24/7 for our clients. With talent in the same or similar time zone as our clients around the world, plus a cultural fit needed in scarce talent availability markets.

We are strategic allies of your business: our team is made up of professionals who are deeply involved in each project. This is why we are not only a solution provider, but also a business partner that creates value in every company that chooses us. With a Startup DNA embedded in every employee we talk in the same language of a Startup and also from a big company.

Great Place to Work® Certification™: we obtained this significant recognition for the quality of the organizational culture of the organization. Companies that build trust with their employees create cultures that positively impact their business outcomes.
